

NMHC Invention Disclosure Form

To be completed by: Inventor/Covered Person

Proposed title of idea or concept:

Contributors:

(used only to identify inventorship and for correspondence)

Full Legal Name	Country of Citizenship	Home address, including country of residence
Full Legal Name	Country of Citizenship	Home address, including country of residence
Full Legal Name	Country of Citizenship	Home address, including country of residence
Full Legal Name	Country of Citizenship	Home address, including country of residence
Full Legal Name	Country of Citizenship	Home address, including country of residence

Any non-NMHC Contributors?

No Yes, please identify name(s) and respective employer(s):

Proof of Conception:

Who first thought of the concept?	Date (even if approximate)	Where (preliminary notes, notebook, drawings, internal project team discussion, etc.)
Who first wrote a description of the concept?	Date (even if approximate)	Where (preliminary notes, notebook, drawings, internal project team discussion, etc.)
To whom was the idea first disclosed?	Date (even if approximate)	Where (preliminary notes, notebook, drawings, internal project team discussion, etc.)
Has the idea been posted on an internal company webpage?	Date (even if approximate)	Where
What is the source of the idea (internal data, literature, etc.)?	Date (even if approximate)	Where (internal discussion, website, etc. - please supply any literature citations)

Are any disclosures to third parties planned?

	YES	NO	
3 rd party disclosure	<input type="checkbox"/>	<input type="checkbox"/>	
under a CDA	<input type="checkbox"/>	<input type="checkbox"/>	If no, please provide details:
abstract, meeting, etc.	<input type="checkbox"/>	<input type="checkbox"/>	If yes, please provide details:

Note: All evidence of conception (first slides, pictures, data and first verbal or written mention) and evidence of reduction to practice (e.g., test data) must be retained.

Description of the Concept/Idea:

Give a brief description of your concept/idea, particularly identifying the features that distinguish the concept/idea from prior methods, compositions, etc., and include aspects that NMHC may want to advertise as distinguishing from other products/competitors.

What technical problem exists and why is it a problem? How can your concept be used to address or solve the problem? Please cite appropriate references.

Explain the scientific or technical difference between your concept and prior methods, compositions, etc. Please cite appropriate references.

Are you aware of any entities that may be interested in or working in this area (both academic and commercial)?

Are there any identifiable alternate applications/industries that could use the concept/idea?

Does the concept/idea require any further development? Please list any additional resources and data that will be needed.

Does internal data exist that will support the concept/idea? Please include any internal/external expertise, evidence of a microbiome signal, and/or requirements regarding access to patient samples. Please cite any references that may have influenced the idea/concept.

Please attach a brief “methods and materials” section along with any key graphs/data or explanatory slides of the concept (e.g., a concept flowchart).
